

FUND OBJECTIVE

The aim is to maximise investor total return over the long term through a focused portfolio of high quality JSE listed equity securities.

FUND FEATURES

- A concentrated equity-only portfolio that may invest across all sectors of the JSE
- The portfolio will hold between 20 – 30 companies

SUITABLE INVESTORS

The portfolio is suitable for investors who:

- Have a time horizon that exceeds five years
- Seek JSE listed equity exposure
- Have discretionary wealth and require little short-term income
- Can tolerate short-term market fluctuations in pursuit of maximising long-term total return
- Are comfortable to grant the portfolio manager a large degree of investment discretion

Jean-Pierre du Plessis

The fund is managed by Jean-Pierre du Plessis, a director of Stonehage Fleming Global Equity Management (South Africa). Jean-Pierre has almost 20 years experience in equity markets and joined the Group in 2011 to help establish the Group's onshore direct equity offering.

FUND COMMENTARY

The South African 2024 budget speech was delivered in February with the main talking point being government accessing the Gold and Foreign Exchange Contingency Reserve Account (GEFECRA). Approximately R150bn will be drawn from this account over a three-year period. The minister of finance remains committed to a path of fiscal consolidation and debt stabilisation.

BidCorp reported half year results to 31 December 2023, reporting a pleasing operational performance against record-high numbers in the prior comparative period. Group revenue grew +24% (constant currency +10.8%), headline earnings grew +18.8% (constant currency +6.8%), and the dividend was up +19.3%. The company continues to invest for growth with many "key projects in the works" and smaller "acquisitions on the boil". Their balance sheet remains strong (0.5x net debt/EBITDA) and guidance from management is for continued growth as the first half momentum continues into the second half.

BHP's half year results highlighted a slightly softer operational performance. They raised a further provision for Samarco and recognised impairments to their Nickel business. Revenue grew +6% whilst organic production volumes were broadly stable. Unit costs increased +5%, with EBITDA also up +5% at a margin of 53%. An interim dividend of \$3.6bn was announced, representing a 56% payout ratio. Their balance sheet remains strong with net debt to EBITDA of just 0.5x, which is more than manageable for a business so low on the cost curve.

FirstRand interim results contained no surprises, benefiting from continued new business momentum, deposit growth, and the endowment benefit from the current interest rate cycle. Net interest income grew +13.5% and non-interest revenue grew +4.1%. Despite some cyclical pressures and base effects, the group delivered an ROE of 20.6%. Their credit loss ratio deteriorated from 0.74% to 0.83%, better than expected and well below the mid-point of the group's through-the-cycle range. Headline earnings and dividends grew +6%.

ADDITIONAL INFORMATION

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.prescient.co.za
