

Omba Global Equity Fund

A sub-fund of Omba Investments ICAV

1Q 2025 Minimum Disclosure Document and General Investor Report

Investors should read the Key Investor Information Document and Prospectus prior to investing.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to achieve capital appreciation over the long term. The Fund aims to achieve this objective through investing (primarily through collective investment schemes structured as exchange traded funds) in a **GLOBAL and DIVERSIFIED portfolio of equity securities** allocated across regions, countries, and sectors.

The Fund aims to be invested in a diversified portfolio of equity and equity-related securities where the investment profile could be considered comparable to a 100% global equity allocation.

MARKET COMMENTARY

The radical shift in market leadership continued in March as European equities (Stoxx 600, -3.7% MoM, +5.9% QoQ) fell alongside global markets (MSCI ACWI, -3.9% MoM, -1.2% QoQ), but maintained their outperformance against US equivalents (S&P 500, -5.6% MoM, -4.3% QoQ). High beta US tech stocks (Nasdaq 100, -7.6% MoM, -8.1% QoQ) and small caps (Russell 2000, -6.7% MoM, -10.6% QoQ) suffered more. Quarterly performance of US assets was even more negative for non-US based investors when one considers US Dollar weakness. The expectation of higher fiscal spending pushed German yields higher (DE 10Y, +36.5bps QoQ). Consequently, and much to the US administration's approval, the Euro gained against the US Dollar (EURUSD, +3.9% MoM). In fact, US Dollar weakness was a theme across Forex crosses (DXY Index, -3.2% MoM) with the Great British Pound (+2.5% MoM) and the Japanese Yen (USDJPY, -4.8% QoQ) also gaining in March and Q1. Over in Asia, Japanese equities finished Q1 lower (Nikkei 225, -3.3% MoM, -9.9% QoQ). Chinese markets were also mixed but overall outperformed western markets. Onshore equities were slightly down for the quarter (CSI 300, -0.1% MoM, -1.0% QoQ) while offshore stocks showed considerable strength (Hang Seng, +1.1% MoM, +16.1% QoQ). Other Emerging Markets such as Brazil (Bovespa, +6.1% MoM, +8.3% QoQ), Mexico (iShares MSCI Mexico Capped UCITS ETF, +0.5% MoM, +9.5% QoQ) and India (Nifty 50, +6.3% MoM, -0.3% QoQ) also outperformed. Consequently, Emerging Markets (MSCI EMS, +3.0% QoQ) outperformed developed regions (MSCI World, -1.7% QoQ) by a margin due to the evident weakness of US equities. Oil prices remained below \$75/bbl, flat for the quarter, suppressed by imminent tariffs and increasing OPEC supply. Gold was the undeniable champion (+9.6% MoM, +19.0% QoQ) as investors desperately seek safe havens in an increasingly volatile environment while questioning the US government's fiscal and trade strategy. In March, we topped up our Mexico position as the Mexican government shows signs of cooperation and price levels remain attractive.

Omba Global Equity Fund

A sub-fund of Omba Investments ICAV

GLOSSARY OF TERMS

Annualised Volatility	Annualised volatility is a statistical measure of the magnitude of the historical daily (logarithmic) returns of the portfolio NAV, scaled to be representative of a full calendar year using a 256-day count. Only the NAV of trading days are used in calculating this measure.
Annualised Return	Annualised return is a measure which rescales returns, for periods greater than one year, to a 12-month geometric average return.
Best/Worst 12 Months	Respectively, the maximum and minimum % change in NAV Per Share over a 12-month period using daily performance data.
NAV Per Share	Net Asset Value (NAV) Per Share represents the total market value of the portfolio less liabilities and divided by the number of outstanding shares.
Positive / Negative Month(s)	A month is positive (negative) if the NAV Per Share, of a specific share class, increases (decreases) in value from the last day of the previous month to the last day of the following month.
Risk Indicator	The risk indicator for the Fund is set at 4 as this reflects the market risk arising from the proposed investments. The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free; the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains.

FUND SPECIFIC RISKS

Equity investment Risk: Value of equities (e.g., shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g., bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Currency Risk: The change in price of one currency in relation to another. This is common where you invest using multiple currencies, either intentionally or not (i.e., underlying holdings of a UCITS would be un-intentional). Change in exchange rates may have an adverse effect on performance.

Geographic/Sector Risk: Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information.

Market Risk: The Fund is subject to market fluctuations and the risks inherent in all investments and there can be no assurance that an investment will retain its value or that appreciation will occur. The price of shares and the income from shares can go down as well as up and investors may not realize the value of their initial investment.

CONTACT DETAILS

Copies of the prospectus (including the UK and Swiss Country Supplement, the supplement for the Fund) (together the "Prospectus"), the Key Information Documents ("KIDs") and the daily share prices are available free of charge from the Manager. The A and B share classes are approved offshore reporting funds in the UK. For further details please visit <https://www.gov.uk/government/publications/offshore-funds-list-of-reporting-funds>.

The Fund is a sub-fund of the Omba Investments ICAV and is authorised by the Central Bank of Ireland as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No. 352 of 2011) as amended. Authorisation by the Central Bank of Ireland shall not constitute a warranty as to the performance of the Fund and the Central Bank of Ireland shall not be liable for the performance or default of the Fund. The Fund is authorised for distribution to non-qualified investors by the Swiss Financial Market Supervisory Authority (FINMA).

DISCLAIMER

The fund adhered to the policy objectives as stated in the Supplemental Deed in terms of allowed investments.

Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant sub-fund, and the relevant subscription application forms, all of which must be read in their entirety together with the Prospectus, Supplements and the KID. No offer to purchase shares will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. Please note that all documents, notifications of deposit, investment, redemption, and switch applications must be received by the Manager by or before 10h00 (Irish time) each business day. Where all required documentation is not received before the stated cut off time, the Manager shall not be obliged to transact at the net asset value price as agreed to and the application will be held over until the next Dealing Day. Funds are priced at 17h00 (New York Time). Prices are published daily and available from the Manager.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the risk so including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio ("TER") reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management and administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. These amounts may change without any notice although within the confines of the Fund Supplement.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investors performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

This document is for information purposes only and does not constitute or form part of any offer to issue or sell or any solicitation of any offer to subscribe for or purchase any investments or any advice. Opinions expressed in this document may be changed without notice at any time after publication. Omba therefore disclaim any liability for any loss, liability, damage (whether direct or consequential) or expense of any nature whatsoever, which may be suffered as a result of, or which may be attributable directly or indirectly to the use of or reliance upon the information. Independent financial advice should be sought as not all investments are suitable for all investors. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.

Upon sourcing the underlying holdings within each of the ETFs: 100% are from 31 March 2025. Price-Earnings Ratio data greater than 80 were capped at 80 (this amounts to 2.44% of Equity data).
