

Omba Moderate Risk Global Allocation Fund

A sub-fund of Omba Investments ICAV

3Q 2023 Minimum Disclosure Document and General Investor Report

Investors should read the Key Investor Information Document and Prospectus prior to investing.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to achieve capital appreciation over the medium to long term. The Fund aims to achieve this objective through investing (primarily through collective investment schemes structured as exchange traded funds) in a **GLOBAL and DIVERSIFIED portfolio of equity and fixed income securities** allocated across regions, countries, and sectors.

The Fund aims to be invested in a moderate risk portfolio of equity and fixed income securities where the risk profile could be considered comparable to a 50% global fixed income / 50% global equity allocation.

The benchmark is United States Consumer Price Index ("CPI") plus 3% p.a., a common measure of inflation plus an excess risk premium.

Omba Moderate Risk Global Allocation Fund

A sub-fund of Omba Investments ICAV

MARKET COMMENTARY

Markets (MSCI ACWI, -4.3% MoM, -3.8% QoQ) faced selling pressure in September and finished Q3 in negative territory as the US 10-year (+47.7bps MoM, +76.4bps QoQ) spiked for the 5th month in a row, reaching a 16-year high. The sell-off was widespread, affecting both developed (MSCI World\$, -4.4% MoM, -3.8% QoQ) and developing markets (MSCI EMS\$, -2.8% MoM, -3.7% QoQ). Investors adjusted their yields expectations upwards despite inflation looking more manageable and declining across the US (CPI August 2023, +3.7% YoY), Europe (HICP September, +4.3% YoY) and the UK (CPI August 2023, +6.7% YoY). Better than expected inflation prints in Europe and the UK in conjunction with a steeper US yield curve strengthened USD against both Euro (EURUSD, -2.5% MoM) and Sterling (GBPUSD, -3.7% MoM) while Yen (USDJPY, +2.7% MoM) touched 150/USD which is the upper BoJ tolerance limit. One would have expected tech heavy indices (especially high duration ones with rate sensitivity) (Nasdaq 100, -5.1% MoM, -3.1% QoQ) to tumble more than more diverse blue-chips (S&P 500, -4.9% MoM, -3.6% QoQ) and small-caps (Russell 2000, -6.0% MoM, -5.5% QoQ), but this was hardly the case as investors favour tech giants for their high-quality earnings and strong balance sheets despite their rich valuations. The underperformance of S&P 500 Equal Weight (-5.3% MoM, -5.4% QoQ) against S&P 500 Market Cap Weighted is another expression of this market distortion. Our portfolio is positioned to benefit should this trend reverse. European equities (Stoxx 600, -1.7% MoM, -2.5% QoQ) did not escape the risk-off atmosphere, except for the UK market (FTSE 100, +2.3% MoM, +1.0% QoQ) which benefitted from OPEC supply cuts and the consequent rise in oil prices (Brent 1st month, +9.7% MoM, +27.2% QoQ). European equities continue to trade close to the low-end of their historical multiples range. Japan (Nikkei 225, -2.3% MoM, -4.0% QoQ) alongside Korea (KOSPI, -3.6% MoM, -3.9% QoQ) also fell in September. Emerging markets were mixed, with India (Nifty 50, +2.0% MoM, +2.3% QoQ) performing best, followed by Brazil (Bovespa, +0.7% MoM, -1.3% QoQ). China (CSI 300, -2.0% MoM, -4.0% QoQ) performed in line with developed indices in Q3. Gold (LBMA Gold, -4.4% MoM, -3.1% QoQ) underperformed following lower inflation rates. The significant rally in H1 2023 expanded multiples to "expensive" territory for some indices, particularly in the US. However, the Q3 correction created some attractive market segments. "Clean energy" (S&P Global Clean Energy Index, -8.9% MoM, -26.8% YTD) is one such example of boom and bust. Investors hyped this segment to extreme valuations during the pandemic and have punished it ever since. As a result, this basket now appears cheaper than the S&P 500 even though it offers superior long-term secular growth prospects, fuelled by strong macroeconomic and policy tailwinds. In September, we took advantage of this mispricing by increasing our allocation to Clean Energy while taking some profit from our US quality factor exposure.

GLOSSARY OF TERMS

Annualised Volatility	Annualised volatility is a statistical measure of the magnitude of the historical daily (logarithmic) returns of the portfolio NAV, scaled to be representative of a full calendar year using a 252-day count. Only the NAV of trading days are used in calculating this measure.
Annualised Return	Annualised return is a measure which rescales returns, for periods greater than one year, to a 12-month geometric average return.
ESG Score	The SFDR Metric is based on how the underlying holdings of the Fund are classified in terms of the EU's Sustainable Finance Disclosure Regulation. Some holdings may not be classified or may be classified as Article 6 (funds which do not integrate any kind of sustainability into the investment process) – these have been grouped as Other; Article 8 (a Fund which "promotes, among other characteristics, environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices") or Article 9 (a Fund which "has sustainable investment as its objective").
Best/Worst 12-Months	Respectively, the maximum and minimum % change in NAV Per Share over a 12-month period using daily performance data.
NAV Per Share	Net Asset Value (NAV) Per Share represents the total market value of the portfolio less liabilities and divided by the number of outstanding shares.
Positive / Negative Month(s)	A month is positive (negative) if the NAV Per Share, of a specific share class, increases (decreases) in value from the last day of the previous month to the last day of the following month.
Risk Indicator	The risk indicator for the Fund is set at 4 as this reflects the market risk arising from the proposed investments. The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the possibility of making gains.

DISCLAIMER

The fund adhered to its policy objective. Shares in the Omba Moderate Risk Global Allocation Fund ("Fund") cannot be offered in any jurisdiction in which such an offer is not authorised or registered. Omba employees or agents are not responsible for providing you with legal, tax or other specialist advice and you should make your own arrangements in respect of this accordingly. Omba has based this document on information obtained from sources it believes to be reliable but which have not been independently verified. Omba is under no obligation and gives no undertaking to keep the information in this document up to date. No representation or warranty, express or implied, is or will be made, and no responsibility or liability is or will be accepted by Omba, or by any of its officers, employees or agents, in relation to the accuracy or completeness of this document or of any information contained within it. Accordingly, except in the case of fraudulent misrepresentation, neither Omba nor any of its officers, employees or agents shall be liable to any person for any direct, indirect or consequential loss arising from the use of this document.

The Fund is a sub-fund of the Omba Investments ICAV, an open-ended umbrella type Irish collective asset-management vehicle with variable capital and limited liability and segregated liability between sub-funds registered with and authorised by the Central Bank of Ireland as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No. 352 of 2011) as amended. The Fund is managed by Prescient Fund Services (Ireland) Limited (the "Manager") of 35 Merrion Square East, Dublin 2, Ireland, which is authorised by the Central Bank of Ireland, as a UCITS Management Company. Authorisation of the Omba Global Thematic Fund by the Central Bank of Ireland is not an endorsement or guarantee nor is the Central Bank of Ireland responsible for the contents of the prospectus. Authorisation by the Central Bank of Ireland shall not constitute a warranty as to the performance of the Fund and the Central Bank of Ireland shall not be liable for the performance or default of the Fund. Omba Advisory & Investments Limited, which is authorised by the Financial Conduct Authority in the United Kingdom, and by the Financial Sector Conduct Authority in South Africa (FSP 49101) of Cargo Works (Unit 4.04), 1-2 Hatfields, London, SE1 9PG, United Kingdom, is the Investment Manager, responsible for managing the Fund's investments. The Manager retains full legal responsibility for the Fund. The Omba Moderate Risk Global Allocation Fund is approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002. Copies of the prospectus (including the UK Country Supplement, the supplement for the Fund) (together the "Prospectus"), the Key Investor Information Documents ("KIIDs") and the daily share prices are available free of charge from the Manager or on www.prescient.ie. The A and B share classes are approved offshore reporting funds in the UK. For further details please visit www.gov.uk/government/publications/offshorefunds-list-of-reporting-funds

Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant sub-fund, and the relevant subscription application forms, all of which must be read in their entirety together with the Prospectus, Supplements and the KIID. No offer to purchase shares will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by the Manager by or before 10:00am Irish time each business day. Where all required documentation is not received before the stated cut off time, the Manager shall not be obliged to transact at the net asset value price as agreed to and the application will be held over until the next Dealing Day. The Fund is authorised for distribution to non-qualified investors by the Swiss Financial Market Supervisory Authority FINMA. The Prospectus and the Supplements of the Funds, the Key Investor Information Documents ("KIIDs"), the Instrument of Incorporation as well as the annual and interim reports of the Company are available free of charge from the Swiss Representative 1741 Fund Solutions AG. The Swiss paying agent is Tellco AG.

The investments of the Fund are subject to market fluctuations and the risks inherent in all investments and there can be no assurance that an investment will retain its value or that appreciation will occur. Changes in exchange rates may have

an adverse effect on the value, price and/or income of the product. Independent financial advice should be sought as not all investments are suitable for all investors. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. The price of shares and the income from shares can go down as well as up and investors may not realize the value of their initial investment. Accordingly, an investment in the Fund should be viewed as a medium to long-term investment. Past performance may not be a reliable guide to future performance. Prospective investors should consult a stockbroker, bank manager, solicitor, accountant, financial adviser or their professional advisers accordingly. Prices are published daily and are available on the Prescient website.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund invests in other Collective Investment Schemes that levy their own charges, which could result in a higher fee structure. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investors performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

The Fund's Total Expense Ratio ("TER") reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management and administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. These amounts may change without any notice although within the confines of the Fund Supplement.

Upon sourcing the underlying holdings within each of the fixed income and equity ETFs: 44.6% are from 29 Sep 2023, 47.9% are from 02 Oct 2023, and 7.5% from 31 Aug 2023. Equity and fixed income metrics (such as Price-Earnings Ratios and Maturity are as of 29 Sep 2023). Upon sourcing Equity Breakdown data from Refinitiv, unclassified data (which was not used) for each of the presented measures are: 1.8% for Company Market Cap data, 3.2% for Price-Earnings Ratio data, 16.7% for Dividend Yield data. Price-Earnings Ratio data from Refinitiv greater than 80 were capped at 80 (this amounts to 0.36% of Equity data). Within the Equity Breakdown section, Sector Breakdown is the sector to which each of the underlying companies are exposed (unclassified data: 1.8%), Country Breakdown is the country of headquarters for each underlying company (unclassified data: 1.8%) and Currency Breakdown is the currency in which each underlying company trades and it does not necessarily reflect the currency of exposure (unclassified data: 1.8%). Upon sourcing the Fixed Income Breakdown data from Refinitiv, unclassified data (which was not used) for each of the presented measures are: 4.3% for Time to Maturity data, 8.1% for Yield to Maturity (YTM) and 8.0% for Duration data. Yield to Maturity has been calculated as the lower of YTM and Yield to Worst.
