

Objective

- The Fund seeks long-term growth of principal and income.

Strategy

- The Fund invests primarily in a diversified portfolio of U.S. equity securities. In selecting investments, the Fund invests in companies that, in Dodge & Cox's opinion, appear to be temporarily undervalued by the stock market but have a favorable outlook for long-term growth. The Fund focuses on the underlying financial condition and prospects of individual companies, including future earnings, cash flow, and dividends. Various other factors, including financial strength, economic condition, competitive advantage, quality of the business franchise, and the reputation, experience, and competence of a company's management are weighed against valuation in selecting individual securities.

Risks

- The Fund is subject to market risk, meaning holdings in the Fund may decline in value for extended periods due to the financial prospects of individual companies or due to general market and economic conditions. Please read the prospectus for specific details regarding the Fund's risk profile.

1. Portfolio turnover is calculated as the lesser of portfolio purchases or sales divided by the average portfolio value.

2. Dodge & Cox has voluntarily agreed to reimburse the Fund for all ordinary expenses to the extent necessary to limit aggregate annual ordinary expenses to 0.63% of the average daily net assets of each share class. Dodge & Cox may terminate or modify this agreement upon 30 days' notice to shareholders.

3. Historic yield reflects distributions declared over the past twelve months as a percentage of the current share price. Investors may be subject to tax on their distributions.

4. Price-to-earnings (P/E) ratios are calculated using 12-month forward earnings estimates from third-party sources as of the reporting period. Estimates reflect a consensus of sell-side analyst estimates, which may lag as market conditions change.

5. Dividend yield is an indication of the income generated by the Fund's portfolio holdings. It represents a weighted average of the gross dividend yields for each holding.

6. The Fund's portfolio holdings are subject to change without notice. The mention of specific securities is not a recommendation to buy, sell, or hold any particular security and is not indicative of Dodge & Cox's current or future trading activity.

7. Net Cash & Other includes cash, short-term investments, unrealised gain (loss) on derivatives, receivables, and payables.

Returns represent past performance and do not guarantee future results. Investment return and share price will fluctuate with market conditions, and investors may have a gain or loss when shares are sold. Fund performance changes over time and currently may be significantly lower than stated above. Visit the Fund’s website at dodgeandcox.com for current month-end performance figures.

Risk and Reward Profile

This risk and reward indicator is designed to provide you with a measure of price movement based on historical data over the past five years.

The indicator may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

The Fund invests mainly in equity and equity-related securities of companies. Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. The Fund has adhered to its policy objective during the period.

The Fund may also be exposed to other material risks that the risk indicator does not adequately capture. These may include:

- **Liquidity risk:** the risk that the Fund may not be able to purchase or sell a security in a timely manner or at desired prices or achieve its desired weighting in a security.
- **Derivatives risk:** investment in derivatives may create leverage and may cause the fund to lose as much as or more than the amount invested.

More information on the risks of investing in this Fund can be found in the Fund’s prospectus in the sections titled “Investment Risks and Special Considerations” and “Characteristics and Risks of Securities and Investment Techniques”.

Distributions

The Distributing Share Classes listed below distribute net investment income quarterly. Dividend and interest income for Accumulating Share Classes will be reinvested in the Fund and will not be distributed to you.

Important Information

This document serves as the Minimum Disclosure Document in South Africa as required by the Advertising, Marketing and Information Disclosure Requirements for Collective Investment Schemes published by the South African Financial Sector Conduct Authority.

The Dodge & Cox Worldwide Funds plc — U.S. Stock Fund (the “Fund”) is a Collective Investment Scheme in Securities.

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of an investment may go down as well as up and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending. A schedule of fees and charges and maximum commissions is available from Dodge & Cox Worldwide Funds plc. Neither the Fund nor its Investment Manager provides any guarantee with respect to the capital or the return of a portfolio. Dodge & Cox Worldwide Funds plc is authorised in Ireland and regulated by the Central Bank of Ireland. The sub-funds of Dodge & Cox Worldwide Funds plc available for public sale in South Africa are approved CIS in terms of the Collective Investment Schemes Control Act, No 45 of 2002. Dodge & Cox Worldwide Funds plc is an Associate Member of the Association for Savings & Investment SA (ASISA). The Fund’s Directors reserve the right to close the Fund to new investors.

International investments or investments in foreign securities could be accompanied by additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information. Currency fluctuations may affect the value of overseas investments. When investing in a fund denominated in a foreign currency, your performance may also be affected by currency fluctuations. In emerging markets, the risks can be greater than in developed markets. Investments in derivative instruments entail specific risks that may increase the risk profile of the Fund and are more fully described in the Fund’s prospectus. Performance is calculated for the portfolio. Individual investor performance may differ as a result of initial fees, the actual investment date the date of reinvestment, and dividend withholding tax.

1. The Fund’s total returns include dividends and interest income and reflect the deduction of expenses charged to the Fund. Index returns include dividends but, unlike Fund returns, do not reflect fees or expenses. The S&P 500 Index is a market capitalisation-weighted index of 500 large-capitalisation stocks commonly used to represent the U.S. equity market. All returns are stated in U.S. dollars unless otherwise noted.

Effective Annual Cost

The Effective Annual Cost (EAC) is a measure which has been introduced to allow you to compare the estimated impact of charges on investment returns when you invest in different financial products. It is expressed as an annualised percentage. The EAC is made up of four components, which are added together, as shown in the table below. The effect of some of the charges may vary, depending on your investment period. The EAC calculation assumes that an investor terminates his or her investment in the financial product at the end of the relevant periods shown in the table.

Impact of Future Charges	Investment Assumed to End After			
	Next 1 Year	Next 3 Years	Next 5 Years	Next 10 Years
Investment Management ¹	0.63%	0.63%	0.63%	0.63%
Advice ²	0.00	0.00	0.00	0.00
Administration ²	0.00	0.00	0.00	0.00
Other ²	0.00	0.00	0.00	0.00
Effective Annual Cost	0.63	0.63	0.63	0.63

1. The investment management charge is equal to the ongoing charges figure (OCF) plus performance fees (if applicable) or, in the absence of a published OCF, the published one-year total expense ratio.
2. No advice, administration, or other charges apply at the Fund level.

South African Representative Office

Prescient Management Company (RF) (PTY) LTD, which serves as the Fund's South African Representative, is registered and approved under the Collective Investment Schemes Control Act (No.45 OF 2002) with Registration Number 2002/022560/07. Definitions

Net Asset Value, or **NAV**, represents the assets of the Fund less its liabilities.

Net Asset Value Per Share, or **NAV Per Share**, with respect to a Class of Shares, represents the Net Asset Value of the Fund attributable to that Class divided by the number of Shares in issue of that Class.

Highest 1-year Return and **Lowest 1-year Return** show the highest and lowest annual returns of the relevant Class of Shares for any single calendar year since the inception of the Fund and are meant to show variability of return.

Average Annual Total Return is the weighted average annual compound growth rate of the Class of Shares over the performance period measured, calculated on a NAV Per Share to NAV Per Share basis.
