INVESTMENT OBJECTIVE

To increase the value of its shares, over the long term, through growth in the value of its investments.

INVESTMENT PROCESS

The fund is actively managed and invests mainly in a diversified portfolio of shares of technology development or utilisation companies, with a focus on leading global technology companies. The companies may be anywhere in the world, including emerging markets. Although the fund does not have sustainable investment as an objective, the promotion of environmental and/or social characteristics is achieved through the fund's commitment to maintain at least 10% of the value of its portfolio invested in Sustainable Investments, as defined by the SFDR. In addition to the E/S characteristics promoted, the fund also applies the investment manager's proprietary responsible screen (the T. Rowe Price Responsible Exclusion List). The fund may use derivatives for hedging and efficient portfolio management. For full investment objective and policy details refer to the prospectus. The manager is not constrained by the fund's benchmark.

Past performance is not an indication of future performance. Annualised performance shows longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with distributions reinvested, if any. Sales charges, taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures. MSCI Index returns are shown with net dividends reinvested.

The manager is not constrained by the fund's benchmark, which is used for performance comparison purposes only. The investment policy of the fund changed as at 1 October 2022, with the addition of a minimum commitment to sustainable investments. The performance prior to this date was achieved without this consideration. The investment performance is for illustrative purposes only. The investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and income is reinvested on the reinvestment date.

KEY FUND RISKS - The following risks are materially relevant to the fund (refer to prospectus for further details): **Country (China)** - Chinese investments may be subject to higher levels of risks such as liquidity, currency, regulatory and legal risks due to the structure of the local market. **Currency** - Currency exchange rate movements could reduce investment gains or increase investment losses. **Emerging markets** - Emerging markets are less established than developed markets and therefore involve higher risks. **Issuer concentration** - Issuer concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting those issuers in which the fund's assets are concentrated. **Sector concentration** - Sector concentration risk may result in performance being more strongly affected by any business, industry, economic, financial or market conditions affecting a particular sector in which the fund's assets are concentrated. **Small and mid-cap** - Small and mid-size company stock prices can be more volatile than stock prices of larger companies. **Stock Connect** - Stock Connect is subject to higher regulatory, custody, and default risks as well as liquidity risk and quota limitations. **Style** - Style risk may impact performance as different investment styles go in and out of favor depending on market conditions and investor sentiment.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. The Fund's Ongoing Charges Ratio (OCR) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher OCR does not necessarily imply a poor return, nor does a low OCR imply a good return. The current OCR cannot be regarded as an indication of future OCR's. During the phase in period OCR's do not include information gathered over a full year.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to www.troweprice.com.
