

Aberdeen Standard SICAV I - Emerging Markets Equity Fund

This is a marketing communication. Please refer to the Prospectus of the UCITS/Information document and the KIID before making any final investment decisions

A Acc USD

Minimum Disclosure Document & General Investor report to 31 March 2022

Objective

The Fund aims to achieve a combination of growth and income and is designed for investors seeking exposure to companies in Emerging Markets countries.

The Fund aims to outperform the MSCI Emerging Markets Index (USD) benchmark (before charges).

Portfolio securities

- The Fund invests at least two-thirds in equities and equity related securities of companies based, or carrying out much of their business, in Emerging Markets Countries.
- The Fund may invest up to 30% of its net assets in Mainland China equity and equity-related securities, although only up to 20% may be invested directly through QFI regime, the Shanghai-Hong Kong and Shenzhen-Hong Kong Stock Connect programme or by any other available means.
- The Fund has adhered to its policy objective.

Performance

Cumulative and annualised performance

	1 month	3 months	6 months	Year to date	1 year	3 years (p.a.)	5 years (p.a.)	10 years (p.a.)	Since launch (p.a.)

Performance Data: Share Class A Acc USD

Benchmark history: Benchmark – MSCI Emerging Markets Index (USD)

Source: Lipper. Basis: Total Return, NAV to NAV, net of annual charges, gross Income reinvested, (USD).

Costs may increase or decrease as a result of currency and exchange rate fluctuations. This may impact what you might get back. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the Benchmark / Benchmark / portfolio constraining benchmark. All return data includes investment management fees, operational charges and expenses, and assumes the reinvestment of all distributions. The returns provided do not reflect the initial sales charge and, if included, the performance shown would be lower.

Highest and lowest returns are those that are achieved during any single calendar year over the period specified.

Performance Chart: The investment performance is for illustrative purposes only. The investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and income is reinvested on the reinvestment date.

Past performance does not predict future returns.

Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested.
- The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.

Management process

- The Fund is actively managed.
- The benchmark is used as a reference point for portfolio construction and as a basis for setting risk constraints.
- In order to achieve its objective, the Fund will take positions whose weightings diverge from the benchmark or invest in securities which are not included in the benchmark. The investments of the Fund may deviate significantly from the components and their weightings in the benchmark.
- Due to the active nature of the management process, the Fund's performance profile may deviate significantly from that of the benchmark over the longer term.
- ASI integrate environmental, social and governance (ESG) considerations within the investment process. Details of the Equity ESG Integration Approach are published at www.abrdn.com under "Sustainable Investing".

Health Care	1,7	-
Other	3,3	8,6
Cash	1,7	2,3

- (d) The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- (e) Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.
- (f) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Derivative usage

- Derivatives will only be used for hedging or to provide exposures that could be achieved through investment in the assets in which the Fund is primarily invested. Usage of derivatives is monitored to ensure that the Fund is not exposed to excessive or unintended risks.

¹The Historic Yield as at 28/02/2022 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

The current initial charge applied and due to the Fund is 2% in respect of new subscriptions into the relevant classes. This is an introductory rate for the benefit of the Fund, set as a measure to control capacity, and could potentially increase up to the disclosed maximum stated above at any time. Such initial charge is applied in addition to, or in place of, any other initial charge already applied, such that investors already subject to an initial charge of 2% or above on their subscriptions will continue to incur the same level of initial charge but 2% of that charge shall be payable to the Fund (i.e. where a charge of 2% or above is already levied, such charge is not increased). Please refer to www.abrdn.com for further information.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

This document serves as the Minimum Disclosure Document required in terms of the Advertising, Marketing and Information Disclosure Requirements for Collective Investment Schemes published by the Financial Sector Conduct Authority (FSCA).

Aberdeen Standard SICAV I is domiciled and regulated in Luxembourg and the Aberdeen Standard SICAV I sub-funds available for public sale in South Africa are approved by the Financial Sector Conduct Authority (FSCA). The Aberdeen Standard SICAV I sub-funds are Collective Investment Schemes in Securities. This document describes only one share class; other share classes may be available.

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.

A schedule of fees and charges and maximum commissions is available on request from Aberdeen Asset Managers Limited ("AAML"), 10 Queens Terrace, Aberdeen, AB10 1XL, Scotland and are also available on www.aberdeenstandard.co.za. Additional adviser fees may be paid and if so, are subject to the relevant regulatory disclosure requirements.

AAML does not provide any guarantee either with respect to the capital or the return of a portfolio.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period.

Performance shown is that of the Fund and individual investor performance may differ as a result of initial fees, actual investment date, date of any subsequent reinvestment and any dividend withholding tax.

For any additional information such as fund prices, brochures and application forms please go to www.aberdeenstandard.co.za.

Aberdeen Standard SICAV I has been authorized for public sale in certain jurisdictions and private placement exemptions may be available in others. It is not intended for distribution or use by any person or entity that is a citizen or resident of or located in any jurisdiction where such distribution, publication or use would be prohibited. Tax treatment depends on the individual circumstances of each investor and may be subject to change in the future. You should obtain specific professional advice before making any investment decision.

"This portfolio may be closed to new investors, in accordance with what sets out in the relevant legal documents, in order to be managed in accordance with the mandate. Issued by abrdn Luxembourg S.A. 35a, Avenue J.F. Kennedy, L-1855 Luxembourg. No. S00000822. Authorised in Luxembourg and regulated by CSSF." Aberdeen Asset Managers Limited (AAML) holds a Category I financial services provider (FSP) licence in terms of the Financial Advisory and Intermediary Services Act, 2002, (FAIS) under licence 43675 and also holds professional Indemnity Insurance. The FSP licence entitles AAML to provide "intermediary services" (as defined in FAIS) to South African clients in relation to shares; money market instruments; debentures and securitised debt; warrants, certificates and other instruments; derivative instruments; participatory interests in Collective Investment Schemes; foreign currency denominated investment instruments; long-term deposits; and short-term deposits.

For more detailed information about Morningstar's Analyst Rating, including its methodology, please go to: <http://corporate.morningstar.com/us/documents/MethodologyDocuments/AnalystRatingforFundsMethodology.pdf>

The Morningstar Analyst Rating for Funds is a forward-looking analysis of a fund. Morningstar has identified five key areas crucial to predicting the future success of a fund: People, Parent, Process, Performance, and Price. The pillars are used in determining the Morningstar Analyst Rating for a fund. Morningstar Analyst Ratings are assigned on a five-tier scale running from Gold to Negative. The top three ratings, Gold, Silver, and Bronze, all indicate that our analysts think highly of a fund; the difference between them corresponds to differences in the level of analyst conviction in a fund's ability to outperform its benchmark and peers through time, within the context of the level of risk taken over the long term. Neutral represents funds in which our analysts don't have a strong positive or negative conviction over the long term and Negative represents funds that possess at least one flaw that our analysts believe is likely to significantly hamper future performance over the long term. Long term is defined as a full market cycle or at least five years. Past performance of a security may or may not be sustained in future and is no indication of future performance. For detailed information about the Morningstar Analyst Rating for Funds, please visit <http://global.morningstar.com/managerdisclosures>

Representative Office: Prescient Management Company(RF)(PTY) LTD is registered and approved under the Collective Investment Schemes Control Act (No .45 OF 2002). Registration Number 2002/022560/07. Physical Address :Prescient House, Westlake Business Park, Otto Close,Westlake,7945,South Africa.
