INVESTMENT STRATEGY
The Tweedy, Browne International Value Fund (Euro) seeks capital appreciation by investing throughout the world in a diversified portfolio consisting primarily of equity securities. Investments are focused in developed markets. The Sub-Fund is actively managed without reference to any benchmark.

COMMITMENT OF THE ADVISER
As of 30 June 2026, the current Managing Directors and employees of Tweedy, Browne and their immediate family members, together with one of Tweedy, Browne's retired principals, had more than USD 1.6 billion in value-oriented portfolios, including USD 67.7 million in the International Value Fund (Euro).

RISK INDICATOR DEFINITION
In addition to risk captured by the indicator, the overall Sub-Fund value may be considerably affected by: market risk, liquidity risk, currency risk, derivatives risk, counterparty risk and operational risk.

Results shown are net of fees.

1 Prior to May 17, 2004 the Sub-Fund was denominated in USD and the perceived foreign currency exposure of its investments were hedged to USD. Effective 17 May 2004, the base currency of the Sub-Fund was changed to EUR and the perceived foreign currency exposure of its investments were hedged to EUR. Calendar year 2004 performance and since inception performance figures are based on percentage increase in USD value of shares to 17 May 2004, and percentage increase in EUR value of shares thereafter. Accordingly, such performance figures do not represent the percentage increase in the USD or EUR value of shares in the Sub-Fund over the whole of the indicated periods.

The **Int'l Value (EUR) Primary Index** is a benchmark created and calculated by Tweedy, Browne and represents the MSCI EAFE Index (Hedged to USD) from inception through 16 May 2004; the MSCI EAFE Index (Hedged to EUR) from May 17, 2004 through November 30, 2022; and the MSCI World Index (in EUR) for periods thereafter. The **Int'l Value EUR) Secondary Index** represents the MSCI EAFE Index (in USD) from inception through May 16, 2004; the MSCI EAFE Index (in EUR) from May 17, 2004 through 30 November 30, 2022; and the MSCI World Index (Hedged to EUR) for periods thereafter. Results of each index for calendar year 2004 represent the performance of the MSCI EAFE Index (in USD or Hedged to USD) from 1 January 2004 – 16 May 2004, and the performance of the MSCI EAFE Index (in EUR or Hedged to EUR) from 17 May 2004 – 31 December 2004.

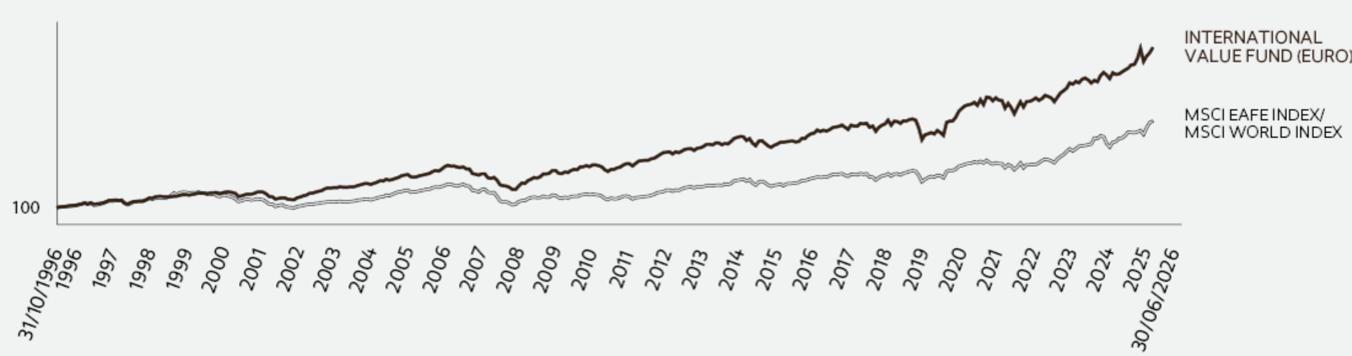
The **MSCI EAFE Index** and **MSCI World Index** are unmanaged, free float-adjusted market capitalization weighted indexes that are designed to measure the equity market performance of developed markets (the US and Canada are excluded from the EAFE Index). The **MSCI EAFE Index (in USD or EUR)** reflects the return of the MSCI EAFE Index for a US dollar investor or euro investor, respectively. The **MSCI EAFE Index (Hedged to USD or EUR)** consists of the results of the MSCI EAFE Index 100% hedged back into the USD or EUR, respectively. The index accounts for interest rate differentials in forward currency exchange rates. Index results are inclusive of dividends and net of foreign withholding taxes.

Performance calculations are presented for Investor Shares.

Results shown are net of fees. Index results are shown for illustrative purposes only and do not reflect any deduction for fees and expenses. You cannot invest in an index.

*Effective 16 November 2022, the Sub-Fund generally does not hedge its foreign perceived currency risk. The value of the Sub-Fund's shares and the return they generate can go down as well as up. They are affected by market volatility and by fluctuations in exchange rates. Upon redemption of shares in the Sub-Fund, investors may not receive the full amount invested. Past performance is no indication of future results. The performance data does not take account of any commissions and costs incurred on the issue and redemption of shares. Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns. The breakdown into sectors and the individual investment items as well as indicated benchmarks are liable to change at any time in line with the investment policy. For additional information in relation to the risk factors, please carefully read the section **"Certain Risk Factors"** in the current legal prospectus.*

GROWTH OF INVESTMENT SINCE 31 OCTOBER 1996



The investment performance of the sub-fund is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown and income is reinvested on the reinvestment date.

MINIMUM DISCLOSURE DOCUMENT & GENERAL INVESTOR REPORT

COMMENTARY & MARKET OUTLOOK (All facts & figures are as of 30/06/2026, unless otherwise noted)

Despite ongoing geopolitical tensions and a rather fragile cease fire in the Iran/US conflict, the second quarter saw a resumption of the AI inspired advance in US technology stocks. Oil transport began moving again in fits and starts in the Strait of Hormuz which helped to alleviate concerns somewhat about the potential for spiking oil prices and their derivative impact on inflation and interest rates. Global equity prices responded in a relief rally that continued through quarter-end.

While US based AI-related companies drove market returns during the quarter, we were heartened to see the advance broadened well beyond the “Magnificent Seven” to include smaller capitalization companies. Non-US equities also moved up, but trailed their US counterparts.

Against this increasingly “risk on” backdrop, the Tweedy, Browne International Value Fund (EUR) returned 8.48% for the quarter and 10.53% YTD, compared to 14.64% and 12.68%, respectively, for its benchmark, the MSCI World Index (in EUR).

While we are pleased with the financial results of the Sub-Fund and global equity markets in the first half of this year, we would be remiss if we did not share our increasing concern about rapidly rising equity valuations in the face of a stubbornly persistent inflation and rising interest rates. The over-arching enthusiasm about all things AI related, and the increasing dominance of a small group of mega-cap technology companies have unleashed “animal spirits” which cannot help but conjure up memories of the late 1990s, lest we forget the late Barton Biggs’ admonition in March of 2000 that “even monkeys fall from trees.”

The Sub-Fund's strongest individual contributors during the quarter included Samsung Electronics, Alphabet, Computacenter, Safran, DHL Group, and Johnson Service Group. Additional positive contributions came from U-Haul Holding, Aalberts, Heineken, and Jazz Pharmaceuticals. The largest individual detractors were TotalEnergies, Kemira, BAE Systems, Rheinmetall, Capgemini, and Zoetis.

From a sector perspective, Information Technology was the largest contributor to absolute return, led by Samsung Electronics and Computacenter. Industrials also contributed meaningfully, supported by strong returns from Safran, DHL Group, Johnson Service Group, U-Haul Holding, and Aalberts. Positive contributions also came from Communication Services, driven primarily by Alphabet, and Health Care, where gains from Roche Holding and Jazz Pharmaceuticals more than offset weakness in several other holdings. Consumer Staples also added to results, led by Heineken. The principal sector detractors were Energy, reflecting weakness in TotalEnergies; Materials, where Kemira detracted; and portions of Industrials and Health Care, where declines in BAE Systems, Rheinmetall, Fresenius, and Zoetis weighed on returns.

Geographically, the largest positive contributions came from holdings based in South Korea, the United States, the United Kingdom, Japan, and Switzerland, while Canada and Finland were the largest country-level detractors during the quarter.

Currency movements provided a modest tailwind during the quarter. Appreciation of the British pound, U.S. dollar, and Singapore dollar against the euro more than offset weakness in the Japanese yen, South Korean won, Canadian dollar, Swedish krona, and Norwegian krone. Given the Sub-Fund's meaningful exposure to U.S. dollar, euro, and British pound-denominated securities, the net effect of currency movements was positive.

During the quarter, the Sub-Fund established new positions in Zoetis, Capgemini, bioMérieux, and Nihon Kohden, while adding to selected existing holdings, including Autotrader Group, CVS Group, Dentium, Kemira, and Winpak, at prices that we believed offered attractive discounts to our estimates of intrinsic value.

The Sub-Fund exited its investments in FedEx, Fuso Chemical, Kanadevia, Koito Manufacturing, Nifco, Okamoto Industries, Taikisha, and Takara Holdings, generally following periods of strong share price appreciation or where our appraisal of intrinsic value had been realized. Sopra Steria Group was a disappointing exception, as our investment thesis changed and we decided to move on. We also reduced positions in Samsung Electronics, Alphabet, ADEKA, and SOL as they approached our estimates of intrinsic value.

While we are delighted with the progress equity markets and our Sub-Fund continues to make, and heartened by the broadening of the rally, in our view there are also reasons for caution. Chief among them: key market indicators sit at or near all-time peak multiples (an approximate 41x Shiller CAPE and a 219% "Buffett Indicator"); S&P 500 margins and earnings appear to be approaching a cyclical peak even as hyperscalers commit to enormous AI capital spending of uncertain economic return; and we see growing signs of a casino mentality, with US margin debt reaching a record $1.4 trillion in May 2026.

We are not, however, suggesting investors abandon sensibly valued publicly traded equities. Today's market resembles the period before the 2000 technology bubble: a smaller group of highly valued US technology companies commands elevated valuations while much of the broader market, particularly outside the US, continues to trade at more reasonable levels. History may not repeat, but it often rhymes.

Our Sub-Fund remains well positioned by issue, country, sector and industry, with growing exposure to smaller and mid-cap companies that offer far more attractive valuations than the US technology giants. Insider buying and corporate buybacks continue to provide valuable signals of undervaluation and the prospect of stronger relative returns. Should our worries prove out and global equity markets get a comeuppance, our Sub-Fund should hold up better and may gain ground on their benchmarks. If, on the other hand, animal spirits continue to support equity prices, we will likely still participate, even if we do not outperform.

DISCLOSURE

The portfolio has adhered to its objective.

INTERNATIONAL VALUE FUND (EUR) *as of 30/06/2026*

MINIMUM DISCLOSURE DOCUMENT & GENERAL INVESTOR REPORT

The Tweedy, Browne International Value Fund (Euro) (the "Sub-Fund") is a sub-fund of Tweedy, Browne Value Funds (the "Fund"), a SICAV established under the laws of the Grand Duchy of Luxembourg. The Sub-Fund is approved by FINMA for the offer to non-qualified investors in Switzerland, and are registered for public sale in Luxembourg, Germany, Italy (for professional investors only), South Africa and the United Kingdom. The Sub-Fund may not be publicly sold in any other jurisdiction and may not be offered or sold in the US. The details given on this page do not constitute an offer and are given for information purposes only. This document is intended for investors in South Africa only.

Investments should only be made after a thorough reading of the current legal prospectus, which contains details of investor rights, and the latest annual and semi-annual reports. The prospectus, KIDs and/or the KIIDs, and the annual and semi-annual reports are available in English on www.tweedysicav.com and www.fundinfo.com. The aforementioned documents as well as the articles of incorporation may also be obtained free of charge by making a written request to the Fund's Central Administrator, UNIVERSAL-INVESTMENT-LUXEMBOURG S.A., 15, rue de Flaxweiler, L-6776 Grevenmacher, Grand Duchy of Luxembourg has been appointed the management company and global distributor of the Sub- Fund. The management company may decide to terminate the arrangements made for the marketing of its collective investment undertakings in accordance with Article 93a of Directive 2009/65/ED and Article 32a of Directive 2011/61/EU.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Fund. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. The Sub-Fund may enter into forward exchange contracts for the purpose of hedging its perceived exposure to certain foreign currencies. The Sub-Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Sub-Fund incurred as costs relating to the buying and selling of the Sub-Fund's underlying assets. Transaction costs are a necessary cost in administering the Sub-Fund and impacts Sub-Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Sub-Fund, investment decisions of the investment manager and the TER.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all subscription documents must be received by Brown Brothers Harriman (Luxembourg), and before investing. Subscription requests will be considered timely if received in good order no later than 12:00 noon Luxembourg time at least two Business Days prior to the desired Valuation Date. Shareholders whose requests for redemption are in order will have their Investor Shares redeemed on the Valuation Date next following receipt of the redemption request, Share certificates (if applicable) and all other necessary documentation, provided that such items are received by the Luxembourg Central Administrator at least ten Business Days prior to the relevant Valuation Date. Where all required documentation is not received before the stated cut-off time, Brown Brothers Harriman (Luxembourg) shall not be obliged to transact at the net asset value price as agreed to.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Fund upon request.

GLOSSARY SUMMARY

Annualised performance shows longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest returns for any 1 year over the period since inception have been shown.

The net asset value (NAV) represents the assets of a Fund less its liabilities.

The Risk Indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and may get back less. The risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. Please refer to the Prospectus for more information on specific risks relevant to the product not included in the risk indicator.

The Shiller CAPE (cyclically adjusted price-to-earnings ratio) measures the valuation of the S&P 500 relative to its average inflation-adjusted earnings over the prior 10 years.

The Buffett Indicator measures total U.S. stock market capitalization relative to U.S. GDP.
