Anglo American	4.34%
Old Mutual	3.89%
AngloGold Ashanti	3.74%
Prosus NV	3.54%

/ Portfolio description

The primary objective of the portfolio is to achieve long term capital appreciation by investing in a diversified portfolio of **South African listed equities**. The portfolio manager acquires local equities at levels below the assessment of the companies' fair values. The portfolio manager also takes cognisance of worldwide economic, sector and investment trends to tilt the portfolio towards attractive sectors and companies.

The Integrity Equity Prescient Fund is required to invest a minimum of 80% of the portfolio in equities and is therefore suitable for investors with an investment horizon of five years or longer.

Integrity diligently follows a **value investment philosophy and process**. This is the same investment philosophy and process applied in managing the Integrity Local Equity Strategy, with track record since 5 August 2011.

The portfolio has adhered to its policy objective since its inception.

/ Historical performance statistics

	Fund	Benchmark
Since inception (cumulative)	47.10%	128.73%
Since inception (annualised)	4.63%	10.20%

Latest distributions	31 March 2025: 1.96 cents per unit

Integrity Equity Prescient Fund March 2025

Minimum Disclosure Document & General Investor Report

/ Sector allocation

/ Relative performance

Over the quarter, the fund generated a negative return of 0.43% compared to the FTSE/JSE All Share Index's total return of 5.94%. The Fund benefitted from its top performing shares over the period, namely; Impala Platinum, Sibanye Stillwater, AB InBev and AngloGold Ashanti. However, due to the Fund's option overlays, the upside on Impala Platinum and Sibanye Stillwater was reduced. Conversely, the largest contributors to the negative return for the Fund was the lack of exposure to gold counters, namely; Gold Fields and Harmony Gold, which contributed -2.31% and -1.03%, respectively. Additionally, the Fund's exposure to Cashbuild, The Spar Group, KAP and Sasol detracted from the Fund's performance. Over the quarter, a continued tilt from value to growth was experienced, as the FTSE/JSE Growth Total Return Index increased by 8.27% compared to an increase of 3.23% in the FTSE/JSE Value Total Return Index. Considering the current macro backdrop, the Investment Manager expects value outperformance to reassert itself in the future once fundamentals start to count again.

/ Fund composition

Over the quarter, the Investment Manager decreased exposure to certain shares that performed well, namely; British American Tobacco, AngloGold Ashanti, AB InBev, Telkom SA, Prosus and Impala Platinum. The Fund increased exposure to Adcock Ingram, Trelidor Holdings, KAP and Astoria Investments. The Investment Manager initiated exposure to Tsogo Sun and Oceana Group over the period. The above portfolio changes resulted in a decrease in cash exposure from 11.60% to 7.31%. The Fund's Resources allocation increased from 26.64% to 28.69%, Industrials allocation increased from 42.09% to 43.09%, and the Financials allocation increased from 19.67% to 20.91%.

Asset Allocation (gross)	2025/03/31	2024/12/31
Cash	7.31%	11.60%
Equities	92.69%	88.40%
Total	100.00%	100.00%

Integrity Equity Prescient Fund March 2025

Minimum Disclosure Document & General Investor Report

/ Glossary

Annualised performance: Annualised performance shows longer-term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The Net Asset Value represents the assets of a Fund less its liabilities.

Risk profile: A measure of the volatility of the fund and volatility is a statistical measure of the dispersion of returns for a given security. Low risk portfolios indicates less volatility with potentially lower returns and high risk portfolios indicates more volatility with potentially higher returns. High risk portfolios generally hold more equity exposure than any other risk portfolios and therefore tend to carry higher volatility.

/ Risk

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

/ Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CISs are traded at the ruling price and can engage in scrip lending and borrowing. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impact Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

The Manager retains full legal responsibility for any third party named portfolio. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the Net Asset Value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the Net Asset Value price as agreed to. Funds are priced at either 15:00 or 17:00 depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the Manager on request.
