**Past performance is not an indication of future performance.** Annualised performance shows longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period.

Source for performance: T. Rowe Price. Fund performance is calculated using the official NAV with distributions reinvested, if any. Sales charges, taxes and other locally applied costs have not been deducted and if applicable, they will reduce the performance figures.

MSCI Index returns are shown with net dividends reinvested.

This benchmark is shown for comparison purposes only.

**Risks** - The following risks are materially relevant to the fund (refer to prospectus for further details):

**Country risk (China)** - all investments in China are subject to risks similar to those for other emerging markets investments. In addition, investments that are purchased or held in connection with a QFII licence or the Stock Connect program may be subject to additional risks.

**Country risk (Russia and Ukraine)** - in these countries, risks associated with custody, counterparties and market volatility are higher than in developed countries.

**Country risk (Saudi Arabia)** - investors from outside the country can gain exposure to Saudi investments only through P-notes. P-notes may carry liquidity risk and may trade at prices that are below the value of their underlying securities. Owners of P-notes may lack some of the rights (such as voting rights) they would have if they owned the underlying securities directly.

**Emerging markets risk** - emerging markets are less established than developed markets and therefore involve higher risks.

**Small and mid-cap risk** - stocks of small and mid-size companies can be more volatile than stocks of larger companies.

**Stock connect risk** - the fund may invest in certain Shanghai listed and Shenzhen-listed securities ("Stock Connect Securities") through the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect respectively ("Stock Connect"). This mechanism carries higher risk.

**Style risk** - different investment styles typically go in and out of favour depending on market conditions and investor sentiment.

**Volatility risk** - the performance of the fund has a risk of high volatility.

## IMPORTANT INFORMATION

**General fund risks - to be read in conjunction with the fund specific risks above. Capital risk** - the value of your investment will vary and is not guaranteed. It will be affected by changes in the exchange rate between the base currency of the fund and the currency in which you subscribed, if different. **Equity risk** - in general, equities involve higher risks than bonds or money market instruments. **ESG and Sustainability risk** - may result in a material negative impact on the value of an investment and performance of the fund. **Geographic concentration risk** - to the extent that a fund invests a large portion of its assets in a particular geographic area, its performance will be more strongly affected by events within that area. **Hedging risk** - a Fund's attempt to reduce or eliminate certain risks through hedging may not work as intended. **Investment fund risk** - investing in funds involves certain risks an investor would not face if investing in markets directly. **Management risk** - the investment manager or its designees may at times find their obligations to a fund to be in conflict with their obligations to other investment portfolios they manage (although in such cases, all portfolios will be dealt with equitably). **Operational risk** - operational failures could lead to disruptions of fund operations or financial losses.

The Funds are sub-funds of the T. Rowe Price Funds SICAV, a Luxembourg investment company with variable capital which is registered with Commission de Surveillance du Secteur Financier and which qualifies as an undertaking for collective investment in transferable securities ("UCITS"). Full details of the objectives, investment policies and risks are located in the prospectus which is available with the key investor information documents in English and in an official language of the jurisdictions in which the Funds are registered for public sale, together with the annual and semi-annual reports (together "Fund Documents"). Any decision to invest should be made on the basis of the Fund Documents which are available free of charge from the local representative, local information/paying agent or from authorised distributors and via [www.troweprice.com](http://www.troweprice.com). Certain numbers in this report may not add due to rounding and/or the exclusion of cash.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. The Fund's Ongoing Charges Ratio (OCR) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher OCR does not necessarily imply a poor return, nor does a low OCR imply a good return. The current OCR cannot be regarded as an indication of future OCR's. During the phase in period OCR's do not include information gathered over a full year.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
