

## Minimum Disclosure Document &amp; General Investor Report - Period ended 28 February 2025

FUND FACTS		INVESTMENT OBJECTIVES						
Portfolio Manager	Jan van Niekerk	<p>The RECM Worldwide Opportunities Prescient QI Hedge Fund aims to achieve medium to long-term capital growth for investors. The fund seeks to capitalise on a wide range of investment opportunities across all asset classes, while maintaining a concentrated portfolio. The fund has maximum flexibility to invest in a diversified range of instruments including, but not limited to, equities, money market instruments, bonds, property, and any other listed and unlisted financial instrument in line with conditions as determined by legislation from time to time. The leverage will not be more than 3:1 (being adjusted gross exposure to net asset value). The manager shall use the commitment method to calculate the Fund's total exposure. Since it has launched, the portfolio has adhered to its policy objective.</p>

FUND NET RETURNS - MONTHLY HISTORY

	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Fund Total	Benchmark
2024														
2025														

Performance figures will be available one year after the fund's inception.

\*\*Total Expense Ratio (TER) and Transaction Costs

The TER reflects the percentage of this Fund's Net Asset Value that was incurred as expenses relating to the administration of this Fund, including the annual fee and the performance fee and intermediary fee if applicable. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction costs are a necessary cost in administering this Fund and impacts this Fund's returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. The TER and Transaction costs are a measure of the actual expenses incurred by this Fund over a 3 year period (annualised). If this Fund is between 1 and 3 years old, the TER and Transaction Costs are calculated using the actual expenses incurred since the inception of this Fund. This sum of the TER and Transaction Costs is shown as the Total Investment Charge overleaf; these costs all being VAT inclusive. Performance is calculated using net NAV to NAV numbers with income reinvested.

Risks associated with investing in the Fund

All investments carry risk. Different investment strategies may carry different levels and kinds of risks depending on the assets held. You should consider the risks listed below in the context of your risk profile, which includes factors such as your investment timeframe, objectives and tolerance for performance volatility, income and age. We do not offer advice, nor does the Fund's investment strategy consider your individual circumstances and we cannot advise that the Fund is suitable for your circumstance. The Manager does not guarantee the Fund's returns, its liquidity, and repayment of capital, interest nor a rate of return. Assets that are expected to provide the highest long-term returns often have the highest short-term risk. The Fund's investment strategy and the assets it invest in will determine the Fund's sensitivity to these risk factors. You should obtain financial advice to determine whether the Fund is suitable for your circumstances before investing in the Fund.

Investment and Business Risk

The Fund may experience losses due to factors that affect the overall performance of the financial markets. The Fund holds securities issued by individual companies and is subject to the business risks specific to them, including sales volumes, profit margins, input costs, competition, economic climate and government regulations. The company may also have exposure to specific financial risk, liquidity risk, market risk, exchange-rate risk and country-specific risks.

Interest Rate Risk

This is the possibility that fixed-rate debt instruments may decline in value as a result of a rise in interest rates.

Credit Risk

Refers to the possibility that a bond issuer may not be able to make expected interest payments and/or principal repayment.

Liquidity Risk

Refers to the possibility that an investor may not be able to invest or disinvest when they want to. This may occur during a period of adverse market trading conditions where the manager may not be able to buy or sell the Fund's investments because opportunities to do so are limited.

Social/Political/Legislative Risk

Risks associated with the possibility of nationalisation, unfavourable government action or social changes resulting in a loss of value is called social or political risk which may affect the Fund.

Currency / Exchange Rate Risk

Currency or exchange rate risk is a form of risk that arises from the change in price of one currency against another. The constant fluctuations in the foreign currency in which an investment is denominated, relative to the currency in which the Fund is denominated, may add risk to the value of a security.

International Risks

International investments or investments in foreign securities could be accompanied by additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information.

Inflation Risk

The Fund may invest in cash and bonds, in South Africa or globally, that do not generate sufficient income and capital gains to outperform inflation.

Key Person Risk

The Fund depends on the expertise of RECM and its investment team. The Fund could be negatively impacted if RECM does not retain key staff.

Third Party Operational Risk

The Fund's operations depend on third parties. Investors in the Fund may suffer financial loss or disruption in the event of third party operational failure.

Fees

A service charge (determined by the investor's selected unit class above) is levied monthly on the market value of the Fund.

Commitment Method

"Commitment approach" means a methodology for calculating exposure that considers the effective exposure of derivatives to, and takes an aggregate view of, securities with the same or similar underlying exposure, where the total commitment is considered to be the sum of the absolute value of the commitment of each individual position, including the derivatives after taking into account netting and hedging.

Leverage

The use of securities, including derivative instruments, short positions or borrowed capital to increase the exposure beyond the capital employed to an investment.

Annualised Performance

Annualised performance show longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest and Lowest Return

The highest and lowest return for any 1 year over the period since inception have been shown.

Net Asset Value (NAV)

The net asset value represents the assets of the Fund less its liabilities.
