

Omba Moderate Risk Global Allocation Fund

A sub-fund of Omba Investments ICAV

4Q 2023 Minimum Disclosure Document and General Investor Report

Investors should read the Key Investor Information Document and Prospectus prior to investing.

INVESTMENT OBJECTIVE

The investment objective of the Fund is to achieve capital appreciation over the medium to long term. The Fund aims to achieve this objective through investing (primarily through collective investment schemes structured as exchange traded funds) in a **GLOBAL and DIVERSIFIED portfolio of equity and fixed income securities** allocated across regions, countries, and sectors.

The Fund aims to be invested in a moderate risk portfolio of equity and fixed income securities where the risk profile could be considered comparable to a 50% global fixed income / 50% global equity allocation.

The benchmark is United States Consumer Price Index ("CPI") plus 3% p.a., a common measure of inflation plus an excess risk premium.

MARKET COMMENTARY

December and Q4 were a great epilogue to 2023 for equity and bond investors alike. The Q4 rally was driven by swiftly adjusting interest rate expectations, which were supported by the increased probability of a soft-landing – meaning lower interest rates, falling inflation, and reasonable growth. Q4 accounted for roughly half the yearly performance of global equity markets (MSCI ACWI, +4.8% MoM, +11.1% QoQ, +22.8% YTD). In bond markets, US 10Y yields fell by 70.7bps QoQ (-47.4bps MoM) to just below 3.9%, finishing 2023 roughly flat after peaking at close to 5% in October 2023. US inflation (CPI November '23, +3.1% YoY) is approaching the 2% target after dropping from its peak of 9.1% in June '22. Shelter (+6.5% YoY) is the last major component of the inflation basket driving “abnormal” price increases. However, observed rental data across the US suggest shelter cost growth is hovering around the 2016–2019 average of 3%. This indicates inflation may subside in 2024 to the broader inflation target of 2%, ceteris paribus. Lower yields benefitted global bond markets (iShares Global Corp Bond ETF, +4.2% MoM, +9.0% QoQ) and especially long duration bonds (iShares \$ Treasury Bond 20+yr UCITS ETF, +8.6% MoM, +12.9% QoQ). Gold (LBMA Gold, +1.4% MoM, +11.2% QoQ) also rose as a result. US blue chips (S&P 500, +4.5% MoM, +11.7% QoQ), tech stocks (Nasdaq 100, +5.6% MoM, +14.6% QoQ) and especially small caps (SPDR Russell 2000 UCITS ETF, +13.7% MoM +15.1% QoQ) led global indices. Small cap outperformance was a welcome sight, showcasing broader participation in equity performance, compared to the previously narrow market led by the “Magnificent 7”. S&P 500 Equal Weight (+6.9% MoM, +11.9% QoQ) also caught up with its market cap sibling, confirming a healthier bull market. European equities (Stoxx 600, +3.8% MoM, +6.8% QoQ) were somewhat softer but US Dollar weakened (EURUSD, +4.3% QoQ). UK equities (FTSE 100, +3.9% MoM, +2.3% QoQ) lagged, driven by ailing commodity (S&P GSCI, -3.6% MoM, -12.1% QoQ) and oil prices (Brent 1st month, -7.0% MoM, -19.2% QoQ). Slower GDP growth (Q3 2023, +4.9% YoY) and often hostile regulatory policy on both sides of the Pacific, made China (CSI 300, -1.8% MoM, -6.8% QoQ) the only major market to finish '23 lower. It remains to be seen how long markets can remain uninterested in attractive valuations and reasonable cash flows. Other emerging markets such as India (Nifty 50, +7.9% MoM, +10.9% QoQ), Brazil (Bovespa, +5.4% MoM, +15.1% QoQ) and Korea (KOSPI, +7.4% MoM, +11.0% QoQ) performed in line with developed counterparties, lifted by risk-on sentiment. Japan (Nikkei 225, +0.1% MoM, +5.2% QoQ, +31% YTD) was another strong performer, while Yen (USDJPY, -5.7% QoQ) touched the 140/USD level as the carry trade becomes less attractive with lower global (ex-Japan) yields. Markets frequently overreact in both directions, and this can present opportunities. AT1 bonds were one example in '23, after some US regional banks and Credit Suisse imploded. The relevant iBoxx AT1 Index fell by 22% with some commentators writing the market’s obituary. The index ended 2023 up 2.6%, not far from 10Y Treasuries (iShares \$ Treasury Bond 7–10yr UCITS ETF, +3.0% YTD). AT1 bonds offer superior value vs. high yield bonds on an option-adjusted spread basis with many GSIB issued AT1s trading at yields close to 10%, thus offering equity-like returns. Given the magnitude of the current rally and low volatility (VIX trading around 5Y lows), we reduced equity exposure in favour of AT1 bonds and cash in order to realise recent gains but also to position the fund more defensively, remain nimble and take advantage of potential spikes in volatility.

GLOSSARY OF TERMS

Active Share	Active share measures the percentage of a fund’s holdings that are different from a comparative fund’s holdings. In this case the OMBA ICAV fund’s holdings are compared with the iShares MSCI ACWI UCITS ETF. Please note this comparison does not include any fixed income or cash equivalents.
Annualised Volatility	Annualised volatility is a statistical measure of the magnitude of the historical daily (logarithmic) returns of the portfolio NAV, scaled to be representative of a full calendar year using a 252-day count. Only the NAV of trading days are used in calculating this measure.
Annualised Return	Annualised return is a measure which rescales returns, for periods greater than one year, to a 12-month geometric average return.
ESG Score	The SFDR Metric is based on how the underlying holdings of the Fund are classified in terms of the EU’s Sustainable Finance Disclosure Regulation. Some holdings may not be classified or may be classified as Article 6 (funds which do not integrate any kind of sustainability into the investment process) – these have been grouped as Other; Article 8 (a Fund which “promotes environmental or social characteristics, or a combination of those characteristics, provided that the companies in which the investments are made follow good governance practices”) or Article 9 (a Fund which “has sustainable investment as its objective”).

Omba Moderate Risk Global Allocation Fund

A sub-fund of Omba Investments ICAV

Best/Worst 12-Months	Respectively, the maximum and minimum % change in NAV Per Share over a 12-month period using daily performance data.
NAV Per Share	Net Asset Value (NAV) Per Share represents the total market value of the portfolio less liabilities and divided by the number of outstanding shares.
Positive / Negative Month(s)	A month is positive (negative) if the NAV Per Share, of a specific share class, increases (decreases) in value from the last day of the previous month to the last day of the following month.
Risk Indicator	The risk indicator for the Fund is set at 4 as this reflects the market risk arising from the proposed investments. The risk indicator is determined using historical data or, where historical data is not available, using simulated historical data. Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not a target or a guarantee and may change over time. A category 1 fund is not risk free, the risk of loss is small but the chance of making gains may also be limited. With a category 7 fund, the risk of losing money is high but so also is the

DISCLAIMER

The fund adhered to its policy objective. Shares in the Omba Moderate Risk Global Allocation Fund ("Fund") cannot be offered in any jurisdiction in which such an offer is not authorised or registered. Omba employees or agents are not responsible for providing you with legal, tax or other specialist advice and you should make your own arrangements in respect of this accordingly. Omba has based this document on information obtained from sources it believes to be reliable but which have not been independently verified. Omba is under no obligation and gives no undertaking to keep the information in this document up to date. No representation or warranty, express or implied, is or will be made, and no responsibility or liability is or will be accepted by Omba, or by any of its officers, employees or agents, in relation to the accuracy or completeness of this document or of any information contained within it. Accordingly, except in the case of fraudulent misrepresentation, neither Omba nor any of its officers, employees or agents shall be liable to any person for any direct, indirect or consequential loss arising from the use of this document.

The Fund is a sub-fund of the Omba Investments ICAV, an open-ended umbrella type Irish collective asset-management vehicle with variable capital and limited liability and segregated liability between sub-funds registered with and authorised by the Central Bank of Ireland as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (S.I. No. 352 of 2011) as amended. The Fund is managed by Prescient Fund Services (Ireland) Limited (the "Manager") of 35 Merrion Square East, Dublin 2, Ireland, which is authorised by the Central Bank of Ireland, as a UCITS Management Company. Authorisation of the Omba Global Thematic Fund by the Central Bank of Ireland is not an endorsement or guarantee nor is the Central Bank of Ireland responsible for the contents of the prospectus. Authorisation by the Central Bank of Ireland shall not constitute a warranty as to the performance of the Fund and the Central Bank of Ireland shall not be liable for the performance or default of the Fund. Omba Advisory & Investments Limited, which is authorised by the Financial Conduct Authority in the United Kingdom, and by the Financial Sector Conduct Authority in South Africa (FSP 49101) of Cargo Works (Unit 4.04), 1-2 Hatfields, London, SE1 9PG, United Kingdom, is the Investment Manager, responsible for managing the Fund's investments. The Manager retains full legal responsibility for the Fund. The Omba Moderate Risk Global Allocation Fund is approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002. Copies of the prospectus (including the UK Country Supplement, the supplement for the Fund) (together the "Prospectus"), the Key Investor Information Documents ("KIIDs") and the daily share prices are available free of charge from the Manager or on www.prescient.ie. The A and B share classes are approved offshore reporting funds in the UK. For further details please visit www.gov.uk/government/publications/offshorefunds-list-of-reporting-funds

Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant sub-fund, and the relevant subscription application forms, all of which must be read in their entirety together with the Prospectus, Supplements and the KIID. No offer to purchase shares will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by the Manager by or before 10:00am Irish time each business day. Where all required documentation is not received before the stated cut off time, the Manager shall not be obliged to transact at the net asset value price as agreed to and the application will be held over until the next Dealing Day. The Fund is authorised for distribution to non-qualified investors by the Swiss Financial Market Supervisory Authority FINMA. The Prospectus and the Supplements of the Funds, the Key Investor Information Documents ("KIIDs"), the Instrument of Incorporation as well as the annual and interim reports of the Company are available free of charge from the Swiss Representative 1741 Fund Solutions AG. The Swiss paying agent is Tellico AG.

The investments of the Fund are subject to market fluctuations and the risks inherent in all investments and there can be no assurance that an investment will retain its value or that appreciation will occur. Changes in exchange rates may have an adverse effect on the value,

price and/or income of the product. Independent financial advice should be sought as not all investments are suitable for all investors. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. The price of shares and the income from shares can go down as well as up and investors may not realize the value of their initial investment. Accordingly, an investment in the Fund should be viewed as a medium to long-term investment. Past performance may not be a reliable guide to future performance. Prospective investors should consult a stockbroker, bank manager, solicitor, accountant, financial adviser or their professional advisers accordingly. Prices are published daily and are available on the Prescient website.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund invests in other Collective Investment Schemes that levy their own charges, which could result in a higher fee structure. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investors performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

The Fund's Total Expense Ratio ("TER") reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management and administration of the Fund. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. These amounts may change without any notice although within the confines of the Fund Supplement.

Upon sourcing the underlying holdings within each of the fixed income and equity ETFs: 56.2% are from 29 Dec 2023, 36.2% are from 2 Jan 2024, and 7.6% are from 30 Nov 2023. Equity and fixed income metrics (such as Price-Earnings Ratios and Maturity) are as of 29 Dec 2023). Upon sourcing Equity Breakdown data from Refinitiv, unclassified data (which was not used) for each of the presented measures are: 1.3% for Company Market Cap data, 2.8% for Price-Earnings Ratio data, 17.3% for Dividend Yield data. Price-Earnings Ratio data from Refinitiv greater than 80 were capped at 80 (this amounts to 0.43% of Equity data). Within the Equity Breakdown section, Sector Breakdown is the sector to which each of the underlying companies are exposed (unclassified data: 1.3%), Country Breakdown is the country of headquarters for each underlying company (unclassified data: 1.3%) and Currency Breakdown is the currency in which each underlying company trades and it does not necessarily reflect the currency of exposure (unclassified data: 1.3%). Upon sourcing the Fixed Income Breakdown data from Refinitiv, unclassified data (which was not used) for each of the presented measures are: 2.4% for Time to Maturity data, 7.6% for Yield to Maturity (YTM) and 7.6% for Duration data. Yield to Maturity has been calculated as the lower of YTM and Yield to Worst.
