

PRESCIENT PROPERTY EQUITY FUND (A2)

MINIMUM DISCLOSURE DOCUMENT

INVESTMENT AND RETURN OBJECTIVE

The Fund offers efficient and cost effective exposure to listed property as represented by the FTSE/JSE SA Listed Property Index. Tracking error to the index is minimised in the process.

INVESTMENT PROCESS

The Fund is a property index fund where returns are enhanced by taking advantage of low risk arbitrage opportunities in the market. Additional benefits are gained from efficient implementation of cash flows, dividend reinvestments, management of corporate actions and index rebalancing. The Fund aims to remain fully invested in property shares at all times.

WHO SHOULD INVEST

Investors who require exposure to SA listed property shares and who are comfortable with the volatility and potential short term capital losses that can result from exposure to property shares.

RISK INDICATOR DEFINITION

These portfolios typically hold meaningful equity and/or offshore exposure which may result in significant capital volatility over all periods. Due to their nature expected long term returns are higher than for the other risk categories.

RISK INDICATOR

FUND COMMENTARY

Global equity markets spent July pulled between two competing stories. Early in the month, renewed tension between the United States and Iran pushed oil prices sharply higher, reviving inflation concerns and lifting global bond yields. As those geopolitical concerns eased, attention turned back to second-quarter earnings and, more pointedly, to whether the scale of capital spending on artificial intelligence can be justified by the returns it is expected to generate. The MSCI World Index gained 0.51% for the month. The more telling movement happened beneath the index level: rather than a broad retreat from AI and technology, the earnings season made investors far more selective about where future profits are likely to land, with capital rotating toward energy and financials and away from semiconductors and the wider technology complex.

In the United States, the S&P 500 was broadly flat, down a marginal 0.06%, despite a supportive reporting season in which most companies beat expectations. For the largest technology names, meeting forecasts was no longer enough and investors wanted evidence that heavy AI-related capital expenditure would translate into future earnings, and that scrutiny drove the rotation away from the sector. European equities gained 0.67%, helped by a greater weighting toward financials and industrials and a lower exposure to technology. Japan illustrated the same rotation in miniature: the Nikkei 225 fell 6.25%, weighed down by its heavier technology and semiconductor exposure and compounded by higher oil prices given the country's reliance on imported energy.

Emerging markets also weakened, with the MSCI Emerging Markets Index declining 3.07%. The weakness was concentrated in South Korea and Taiwan, where the reversal in semiconductor shares following their strong AI driven rally weighed heavily on the index. China was comparatively more resilient and was a positive contributor to the broader EM index, although the CSI 300 itself declined 7.38% during the month.

Locally, the FTSE/JSE All Share Index gained 1.18%, with gains broad-based across sectors. Technology was the strongest performer, up 6.08% as it partially reversed earlier losses, though it remains 20.98% lower year to date. Listed Property added 2.30% on improving operating conditions and attractive relative yields, Basic Materials rose 2.06% on firmer commodity prices, and Financials gained 1.16%. The rand weakened 0.86% against the US dollar as headline inflation rose to 5.0% on higher energy costs; the South African Reserve Bank kept the repo rate unchanged at 7.0%.

Overall, July was defined more by rotation than by any broad shift in risk appetite. Resilient earnings provided underlying support, but investors grew more selective within AI and technology as capital expenditure commitments came under greater scrutiny. Locally, the JSE held up well on resource and financial strength, with technology staging a partial recovery. Higher oil prices and renewed geopolitical tensions were a reminder that inflation risks remain a live consideration for markets.

The top contributors to the Fund's performance for the month were NEPI Rockcastle (3.37%), Vukile Property Fund (4.86%) and Growthpoint Properties (2.49%). Detractors included SA Corporate Real Estate Fund (-2.78%), Fairvest (-1.34%) and Resilient REIT (-0.37%).

PRESCIENT PROPERTY EQUITY FUND (A2)

GLOSSARY

Annualised performance: Annualised performance shows longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest performance: The highest and lowest performance for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

Current Yield: Annual income (interest or dividends) divided by the current price of the security.

CPU: Cents Per Unit to the Glossary

Alpha: Denotes the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Dividend Yield: The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

PE Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.

Fund Specific Risks

% Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

Information Disclosure

The portfolio has adhered to its policy objective and there were no material changes to the composition of the portfolio during the quarter.

PRESCIENT PROPERTY EQUITY FUND (A2)

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TERs. During the phase in period TERs do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction cost is a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 11:00 (SA) for money market funds and the Prescient Optimised Income Fund and by or before 13:00 for all other funds, to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut-off time, Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers, including actual initial and all ongoing fees, with income reinvested on the reinvestment date. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.
