Orchestrating Your Wealth

Prescient

MANAGEMENT COMPANY

31 March 2025

Minimum Disclosure Document & General Investor Report

## Investment objective

The Maestro Equity Prescient Fund will be a general equity portfolio. The Manager in selecting securities for the portfolio will seek to follow an investment policy which will secure for investors an optimum overall return, that is to say the steady growth of income and the preservation of capital in real terms. In order to achieve these main objectives, the investments to be acquired for the Maestro Equity Prescient Fund, shall comprise a mix of securities, financially sound ordinary shares, stock, financially sound preference shares, debenture stock, debenture bonds and unsecured notes as defined in the Act and the Deed, all to be acquired at a fair market value.

## The Fund benchmark

The Fund will measure itself against the FTSE-JSE All Share Index.  
ASISA Classification: South African-Equity-General.

## Legal structure

The Fund is a scheme in the nature of a trust known as a collective investment scheme. The portfolio manager is Maestro Investment Management (Pty) Ltd, an approved Financial Services Provider in terms of the Financial Advisory and Intermediary Services Act, operating under license number 739. This portfolio operates as a white label fund under the Prescient unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

## Fee structure

The maximum initial fee is 2.0%. The annual investment management fee is 1.75%. The annual total expense ratio (TER) for period ended 31 December 2024, in respect of class A was 2.82%.

## Income declaration (annually)

47.43 cents per unit  
31 March 2024

## Fund size

R14 219 726.91

## NAV

Class A: 4 073.03

## Number of units in issue (A class)

296 325.6072

## Fund inception date

1 July 2005

## Management Company

Prescient Management Company (RF) (Pty) Ltd  
PO Box 31142, Tokai, 7945

## Trustee and auditor

Trustee: Nedbank Limited  
Auditor: Ernst & Young incorporated

22 April 2025

## Market Overview

Most equity markets, other than US equity markets, rose on the back of reasonable earnings and management comments. However, as April 2 approached, the day on which the Trump Administration was set to announce its tariff policy, volatility increased, and prices decreased. By mid-month, the German equity market had risen by 3.8% while the US market had fallen 5.7%. The gains would not last though. The US dollar lost ground against nearly every other currency in March, while bonds were firm as investors fled to safety. So much for US exceptionalism and the world that Trump would have us believe he has "created". The US equity market fell 5.6% during March, bringing its *decline* for the year-to-date to 4.3%. That is in stark contrast to the German equity market, which declined 1.7% in March but is still *up* 11.3% so far this year. The Swiss market lost 3.1% in March but gained 8.6% during the March quarter. The MSCI World index lost 4.6% in March and has lost 2.1% so far this year. The dollar lost 2.8% against a trade-weighted basket of other currencies; this weakness supported non-US equity markets and emerging markets. Consequently, the MSCI Emerging markets index *rose* 0.4% in March, and has risen 2.4% so far this year. The Chinese and Indian equity markets rose 0.5% and 5.8% in March respectively; they are both down marginally so far this year. The Brazilian equity market rose 6.1% and is up 8.3% so far this year. On the currency front, the euro and Swiss franc rose 2.9% and 1.0% respectively. Many emerging market currencies were firmer, too. The Bloomberg Global Aggregate Bond index rose 0.6% and has now risen 2.6% so far this year. The weak dollar boosted commodity prices, with the exception of the oil price, which declined 4.6%; it is now down 20.3% during the past year. The price of gold was firm, up 6.6% to a record high, while platinum, palladium and silver prices also rose strongly. The price of Bitcoin lost 2.0%.

"To achieve great things, two things are needed; a plan, and not quite enough time."

- Leonard Bernstein

31 March 2025

## Returns for periods ended 31 March 2025

## Local market returns

The South African market was influenced by global developments. The rand was flat on the month, but the All Share index rose 3.6% and the All Bond index 0.2%. Boosted by firm commodity prices, the Basic Materials index rose 19.5% (bringing its year-to-date increase to 30.3%), and the Financial index rose 0.2%. The Industrial index lost 0.3%. The Large and Mid-cap indices rose 4.1%, and 3.7% respectively, and the Small cap index lost 0.3%.

## Investment Manager comment

*The Maestro Equity Prescient Fund rose 1.3% in March, versus the 3.7% gain of the All Share index. One of the larger contributions to this underperformance is the Fund's relative underweight to the Basic Materials index, which rose 19.5% during the month. The Fund holds no gold shares, which performed strongly during March on the back of the record gold price. Richemont declined 15.1%, while the three global equity index trackers declined in line with their respective underlying indices. Discovery fell 3.6%, Afrimat 3.2%, and Hudaco 2.6%. On a more positive note, Standard Bank rose 9.8% and the Satrix Resources ETF rose 20.7%, in line with the Basic Material index.*

There were no material changes to the Fund's portfolio during March.

The Fund adhered to its Policy objective during the month.

## Largest holdings at 31 March 2025

| Investment                  | % of Fund    |

Orchestrating Your Wealth

**Prescient**  
MANAGEMENT COMPANY  
**Disclaimer**

31 March 2025

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest-bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change. The Manager retains full legal responsibility for any third party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website. Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request. For any additional information such as fund prices, brochures and application forms please go to [www.maestroinvestment.co.za](http://www.maestroinvestment.co.za).

## **Risks**

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected. Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company. Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations. Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

## **Glossary Summary**

**Annualized performance:** Annualized performance shows longer term performance rescaled to a 1 year period. Annualized performance is the average return per year over the period. Actual annual figures are available to the investor on request.

**Highest & Lowest return:** The highest and lowest returns for any 1 year over the period since inception have been shown.

**NAV:** The net asset value represents the assets of a Fund less its liabilities.

## **Total Expense Ratio (TER)**

As at 31 December 2024 the TER for Class A units were as follows:

|                               |       |
|-------------------------------|-------|
| Management Fee                | 2.03% |
| Performance Fees              | 0.00% |
| Other Cost                    | 0.79% |
| Total Expense Ratio (TER)     | 2.82% |
| Transaction Costs (TC)        | 0.01% |
| Total Investment Charge (TIC) | 2.83% |

## **Minimum investment:**

Lump sum: R100 000

Debit order: R1 000

## **Risk Profile:**

The Fund's risk profile is classified as high as listed equity investments make up the majority of the Fund's holdings. Generally, equities have a higher level of volatility compared with other asset classes, however the expected long term returns are higher than other classes.
