

VUNANI GLOBAL EQUITY FUND

A sub-fund of Prescient Global Funds ICAV

Minimum Disclosure Document & General Investor Report
as at 30 June 2025

VUNANI

FUND MANAGERS

INVESTMENT OBJECTIVE

The investment objective of the Fund is to provide investors with long-term capital growth.

There is no guarantee that the objective will be met or that a positive return will be delivered over any time period.

INVESTMENT POLICY

The Fund aims to achieve its objective by investing in global equity and equity-related securities.

The Fund will gain exposure to these companies primarily through direct investment in securities of such companies but may also invest indirectly in such securities through investment via collective investment schemes

FUND INFORMATION

Portfolio Manager:	Rory Spangenberg
Inception date:	21 June 2023
Fund Size:	\$80.2 million
No. of Units Class C:	583,046.54
Unit Price Class C:	\$130.85
Fund Structure:	ICAV UCITS
Benchmark:	MSCI World Net Total Return Index
Domicile:	Ireland
Fund Classification:	Global Equity Large Cap Blend
Currency:	US Dollars (\$)
Minimum investment Class C:	\$ 5 million
Minimum additional investment Class C:	\$ 2,500
Portfolio Valuation Time:	5pm (New York time)
Distributions:	Accumulating
ISIN Number Class C:	IE0004G3Q4S1
Fees (exclude VAT):	
Management Fee:	0.60%
Performance Fee:	None
Other Fees:	0.30%
(include underlying fee (where applicable): Audit Fees, Custody Fees, and Trustee Fees)	
Total Expense Ratio (TER):	0.90%
Management Company:	Prescient Fund Services (Ireland) Limited
Auditor:	Ernst & Young Inc

RISK PROFILE

LOW

MEDIUM

HIGH

High Risk: This portfolio has a higher exposure to equities than any other risk profiled portfolio and therefore tend to carry higher volatility due to high exposure to equity markets. Expected potential long-term returns are high, but the risk of potential capital losses is high as well, especially over shorter periods. Where the asset allocation contained in this MDD reflect offshore exposure, the portfolio is exposed to currency risks, therefore, it is suitable for long term investment horizons.

ILLUSTRATIVE PERFORMANCE

The investment performance is for illustrative purposes only; the investment performance is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown; and income is reinvested on the reinvestment date.

Fund Performance (net of fees)	Fund Class C	Benchmark
1 Year	12.9%	16.3%
3 Years	-	-
5 Years	-	-
10 Years	-	-
Since Inception	14.2%	18.7%
Highest rolling 1 year	32.4%	37.7%
Lowest rolling 1 year	-5.7%	-2.9%

Annualised performance: Annualised performance shows longer term performance rescaled to a 1-year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request. Performance figures are annualised for periods longer than 12 months.

VUNANI GLOBAL EQUITY FUND

A sub-fund of Prescient Global Funds ICAV

Fund Commentary

for the quarter ending 30 June 2025

VUNANI

FUND MANAGERS

Trade policy uncertainty, geopolitical tensions and shifting central bank signals led to heightened volatility in a quarter which was characterised by a sharp equity market drop on “Liberation Day” followed by a strong recovery. The **S&P 500 Index** declined 12% in the first week of the quarter, as the Trump administration’s trade policies threatened to ignite a full-blown trade war.

While investors initially sought comfort in **US Treasuries**, with the yield on the 10-year sovereign bond declining to 4%, recognition of the likely inflationary impact of US tariffs, led to a sell-off in Treasuries, with yields backing up to 4.6% in late-May. The so-called bond vigilantes, therefore had the final say in tempering the administration’s stance on tariffs, with a more measured outcome cheering equity investor’s, resulting in a 24% rally in the **S&P 500 Index** from its early April lows.

Lingering policy uncertainty, including the shifting signals from the **Federal Reserve** on monetary policy, reflected in the continued underperformance of the **US dollar**. Having declined by 4% in 1Q 2025, the dollar lost a further 7% on a trade weighted basis in the second quarter.

Currency weakness was also reflected in equity market returns. The **Nikkei 225 Index**, which gained 13.8% in local currency terms, was the best performing major global index, measured in US dollars, gaining 18.3% during the quarter. While US technology shares enjoyed a strong quarter, the **Nasdaq Composite** gained 17.9%, US equities more broadly, underperformed. The **Stoxx Europe 600 Index** gained 12.3%, the **MSCI Emerging Market Index** was 12.1% higher, while the **S&P 500** and **Russell 2000** indices gained just 10.9% and 8.5% in the quarter.

Amidst this volatility, the **Vunani Global Equity Fund (class C)** gained 9.1% net of fees during the quarter, while the Fund’s benchmark, gained 11.4%. Underperformance, both quarter and year-to-date, only materialised in the last fortnight of the quarter as so-called “meme stocks” and unprofitable tech companies led the market rally. The **Morgan Stanley Unprofitable Tech** and **UBS Meme Stock indices** gained 6.7% and 6.9% respectively between 13th and 30th June, double the MSCI’s 3.2% gain in the corresponding period.

The fund’s underperformance was largely a function of our overweight position in more defensive sectors, notably **Health Care** and **Consumer Staples**, which both lagged the broader market. Positive stock selection results intra sector, however, largely offset the sector allocation call. This was not the case in **Information Technology**, where our meaningful underweight in **Nvidia** and lack of any exposure to **Broadcom**, accounted for -102bps and -58bps of relative performance, not enough to offset the positive contributions from our underweight in **Apple** (+55bps) and the off-benchmark position in **Taiwan Semiconductor Manufacturing Company** (+54bps). Other notable performers included **The Walt Disney Company** which, having fallen 12% in 1Q 2025, rallied 26% in the second quarter and more than 50% from its early April lows where we took advantage of share price weakness to increase our holding.

IMPORTANT INFORMATION

The Vunani Global Equity Fund is a subfund of the Prescient Global Funds ICAV, an open ended umbrella type investment company, with segregated liability between its subfunds, authorised by the Central Bank of Ireland, as an undertaking for collective investment in transferable securities under the European Communities (UCITS) Regulation, 2011 as amended (the Regulations). It is managed by Prescient Fund Services (Ireland) Limited at 49 Upper Mount Street, Dublin 2, Ireland which is authorised by the Central Bank of Ireland, as a UCITS IV Management Company. The Prescient Global Funds ICAV full prospectus and the Fund's KIID are available free of charge from the Manager or by visiting www.prescient.ie.

Collective Investment Schemes in Securities (CIS) should be considered as medium to long term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in script lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the service charge) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER. Fund Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient Fund Services (Ireland) Limited before 10:00 (Irish time), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient Fund Services shall not be obliged to transact at the net asset value price as agreed to. Prices are published daily and are available at www.prescient.ie. The portfolio has adhered to its policy objective. For any additional information on Vunani Fund Manager's investment approach go to: www.vunanifm.co.za.

GLOSSARY

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a fund less its liabilities

RISK DISCLOSURE

The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information.

Default risk: The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

Derivatives risk: The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Derivative counterparty risk: A counterparty to a derivative transaction may experience a breakdown in meeting its obligations thereby leading to financial loss.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

The Vunani Global Equity Fund is registered and approved under section 65 of the Collective Investment Schemes Control Act 45 of 2002.
