

FUND OBJECTIVE & STRATEGY

The ClucasGray Future Titans Prescient Fund has a flexible mandate to invest in a range of asset classes but will typically have high exposure to companies outside of the Top 40 Index. The fund is permitted to invest 25% offshore plus an additional 5% in Africa. The primary objective of the fund is to achieve real long-term capital growth ahead of CPI + 6%. The fund looks to acquire fast growing, mispriced, mid-and small-cap shares, "Future Titans", on the back of high conviction fundamental investment calls. The fund has a deep value / activist bias.

FUND INFORMATION

Portfolio Managers:	Brendon Hubbard, Danie Van Zyl
Inception Date:	01 September 2009
Fund Size:	R150.9 million
Unit Price:	338.39 cents
ASISA Category:	South African - Multi Asset - Flexible
Benchmark:	CPI Upper Limit
Min lump Sum:	R20 000
Min monthly investment:	R 1 000
Issue Date:	15 April 2024

CUMULATIVE VALUE OF R100 INVESTED AT INCEPTION VS BENCHMARK (ILLUSTRATIVE PERFORMANCE)

Source: Prescient Fund Services 31 Mar 2024

The illustrative investment performance is shown for illustrative purposes only and is calculated by taking the actual initial fees and all ongoing fees into account for the amount shown. Income is reinvested on the reinvestment date.

WHO SHOULD INVEST

The fund is a high risk, high return fund and should be invested in as a complementary investment to any long-term blue-chip portfolio.

RISK INDICATOR

Generally, these portfolios hold more equity exposure than any other risk profiled portfolio therefore tend to carry higher volatility. Expected potential long-term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

MONTHLY COMMENTARY

Grindrod, the fund's largest holding, delivered a fantastic result with port volumes up 28% driving earnings up by 29%, taking the ROE to 19% and enabling an 84% increase in the dividend. Since 2020 port volumes have been growing at 23% CAGR with terminal volumes growing at 19% CAGR. The outlook for Grindrod remains very exciting as rail reform is being implemented across Southern Africa. Grindrod already runs locomotives across Namibia, Zimbabwe, Zambia and Mozambique and is investing further capex into locomotives and wagons to facilitate larger loads when these reforms kick off. For example, they will install a new 16m ton ship loader in Maputo, which doubles existing capacity, and will be adding rail capacity to feed this new ship loader with 150 wagons and 5 locomotives purchased in this period. We believe the rail operations will contribute significantly to earnings in the years ahead and Grindrod's valuation remains very cheap - using the multiple from a recent deal where an Indian peer was acquired would imply a value of R40/share for Grindrod.

MAS Real Estate delivered a very strong operational result with earnings up 12.2% in Euros and NAV up a very impressive 11.1% with debt at 24.3% LTV and debt at the JV development company at 29.3%. This debt is the lowest in the sector and continues to head lower as MAS have chosen not to declare a dividend. A key issue on the company's debt is that MAS needs to achieve \$1.5bn of 100% owned assets which would deem them to be investment grade and enable them to issue cheaper investment grade bonds. On the current trajectory, held back by higher interest rates in Europe, the group expects to be slightly short of this requirement by June 2026 but they have several strategies which would allow this \$1.5bn target to be reached. While MAS trades at a 50% discount to NAV, something not unusual in Europe, the insiders continue to buy with the ex-CEO and current development partner buying R773m shares from Attacq at a premium to market, taking insiders' holdings close to 20%.

Valuations remain very cheap and we are expecting a rally in prices as sentiment improves after the election after a more centralist outcome.

The Fund has adhered to its policy objective.

The current asset allocation versus the previous quarter is as follows:

The number of participatory units at 31 March 2024 was 52 505 692.

Fund Asset Allocation	Q1 2024	Q4 2023
Domestic Equity	88%	80%
Offshore Equity	9%	4%
Cash	5%	16%

DISCLAIMER

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used.

The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

Alpha: Denoted the outperformance of the fund over the benchmark.

Sharpe Ratio: The Sharpe ratio is used to indicate the excess return the portfolio delivers over the risk free rate per unit of risk adopted by the fund.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

% Positive Months: The percentage of months since inception where the Fund has delivered positive returns.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.
