Performance Data: Share Class A Acc USD

Benchmark history: Benchmark – MSCI Emerging Market Infrastructure Index (USD)

Source: Lipper. Basis: Total Return, NAV to NAV, net of annual charges, gross Income reinvested, (USD).

Costs may increase or decrease as a result of currency and exchange rate fluctuations. This may impact what you might get back. "Fund (Net)" refers to the actual unit price performance of the shareclass shown; "Fund(Gross)" adds back charges such as the annual management charge to present performance on the same basis as the Benchmark / Benchmark / portfolio constraining benchmark. All return data includes investment management fees, operational charges and expenses, and assumes the reinvestment of all distributions. The returns provided do not reflect the initial sales charge and, if included, the performance shown would be lower.

Past performance does not predict future returns.

- (d) The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- (e) The fund may invest in companies with Variable Interest Entity (VIE) structures in order to gain exposure to industries with foreign ownership restrictions. There is a risk that investments in these structures may be adversely affected by changes in the legal and regulatory framework.
- (f) Investing in China A shares involves special considerations and risks, including greater price volatility, a less developed regulatory and legal framework, exchange rate risk/controls, settlement, tax, quota, liquidity and regulatory risks.
- (g) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Derivative usage

- Derivatives will only be used for hedging or to provide exposures that could be achieved through investment in the assets in which the Fund is primarily invested. Usage of derivatives is monitored to ensure that the Fund is not exposed to excessive or unintended risks.

¹The Historic Yield as at 28/02/2022 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.

²These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.

³The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the fund. It is made up of the Annual Management Charge (AMC) of 1.75% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.

This document serves as the Minimum Disclosure Document required in terms of the Advertising, Marketing and Information Disclosure Requirements for Collective Investment Schemes published by the Financial Sector Conduct Authority (FSCA).

Aberdeen Standard SICAV I is domiciled and regulated in Luxembourg and the Aberdeen Standard SICAV I sub-funds available for public sale in South Africa are approved by the Financial Sector Conduct Authority (FSCA). The Aberdeen Standard SICAV I sub-funds are Collective Investment Schemes in Securities. This document describes only one share class; other share classes may be available.

Collective Investment Schemes in Securities (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity.

CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year.

Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.

A schedule of fees and charges and maximum commissions is available on request from Aberdeen Asset Managers Limited ("AAML"), 10 Queens Terrace, Aberdeen, AB10 1XL, Scotland and are also available on www.aberdeenstandard.co.za. Additional adviser fees may be paid and if so, are subject to the relevant regulatory disclosure requirements.

AAML does not provide any guarantee either with respect to the capital or the return of a portfolio.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period.

Performance shown is that of the Fund and individual investor performance may differ as a result of initial fees, actual investment date, date of any subsequent reinvestment and any dividend withholding tax.
